The MightyMic F microphone Kit brings big sound from a small microphone. Don't be fooled by the compact size. This is a high quality condenser microphone that does not need any batteries as it is powered by the device. So you never get stuck doing that big video shoot only to find out the batteries are dead. Just plug it into the headphone jack of your device. While using an optional app like MoviePro or FilMic Pro you can listen to the sound while recording video and even adjust the gain with MoviePro. For audio recording just open the optional MightyMic Pro Recorder App. It works with iPhone, iPad, and iPod Touch, and Android devices

Package includes foam and deadcat type windscreen, carrying pouch, stabilizer, hot shoe mount for pole/DSLR mount, DSLR mic cable, and microphone.

iPhone, iPad, and iPod Touch are registered trademarks of Apple Inc.
